IN THE SPECIFICATION

Please replace the paragraph beginning at page 1, line 5 with the following:

This application is related to and filed concurrently with pending U.S. Patent Application Serial No. 09/488,395, entitled "System and Method for Determining Subscriber Information." These applications have been commonly assigned to Cisco Technology, Inc.

Please replace the paragraph beginning at page 10, line 17 with the following:

Information server 50 comprises a processor 54 coupled to a memory 56. Processor 54 may comprise a central processing unit associated with a computer system, such as a mainframe, a workstation, or any other suitable general purpose data processing facility. Memory 56 comprises any suitable volatile or non-volatile memory device associated with processor 54. Memory 56 generally stores a number of files, lists, tables, or any other arrangement of information that supports the identification of subscribers 12 in system 10. For example, memory 56 includes identification table 58 having path information 60 and subscriber information 62 for subscribers 12 in system 10. Path information 60 comprises virtual circuit information used to identify the unique virtual circuits 16 assigned to subscribers 12 (e.g., virtual circuit identifiers), access server information, interface information, user information, and/or any other type of information used to identify subscribers 12. Subscriber information 62 comprises address information, configuration information, and/or any other suitable information used to upgrade, monitor, modify, or otherwise operate subscribers 12.
